Professional Summary

Cloud and DevOps Engineer with 1+ year of hands-on experience in AWS, Terraform, Docker, Kubernetes, and CI/CD pipelines. Skilled in designing scalable cloud infrastructure, automating deployments using Infrastructure as Code (IaC), and implementing production-ready DevOps workflows with monitoring and container orchestration.

Skills

Cloud: AWS (EC2, S3, IAM, ECS, VPC), Azure	Containers & Orchestration: Docker, Kubernetes
CI/CD & Automation: Jenkins, GitHub Actions	IaC & Config Management: Terraform, Ansible
Monitoring & Observability: Prometheus, Grafana	Security: IAM, SAST, DAST, SCA
Scripting & Programming: Bash, Python, JavaScript	Version Control: Git, GitHub, GitLab
Operating Systems: Linux (Ubuntu, CentOS)	Databases: MySQL, MongoDB
Networking & APIs: APIs, Nginx, Load Balancing	Methodologies: GitOps, Agile, Microservices

Professional Experience

DevOps Cloud Engineer <i>Zintellix</i>	Oct 2025 - Present India
- Implemented cloud cost optimization, monitoring, and client collaboration, reducing infrastructure costs by 30%, improving system uptime, and directly working with clients for requirement delivery and issue resolution. - Led end-to-end CI/CD pipeline management across AWS and Azure for 10+ developers, reducing deployment time by 50% and improving release efficiency.	
Cloud DevOps Trainee <i>L&T EduTech</i>	Jan 2024 - feb 2025 Hybrid
- Engineered comprehensive CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time by 60% and improving decision-making speed through automated quality gates and testing frameworks. - Established Infrastructure as Code (IaC) using Terraform for cloud resource provisioning, achieving 90% infrastructure consistency and enabling rapid scaling for client projects across multiple environments.	

Technical Projects

Enterprise SaaS Monitoring Platform (CLI + Web): Pulse-Monitor GitHub	Sept 2024
- Developed and deployed an enterprise-grade CLI with SaaS monitoring platform providing real-time system health and performance insights, supporting production workloads from concept to deployment. - Implemented automated CI/CD pipelines using Jenkins, GitHub Actions, Docker, and Kubernetes, enabling scalable and reliable deployments with integrated quality checks.	
Multi-Cloud Scalable Three-Tier Application Deployment on Kubernetes GitHub	June 2024
- Designed a production-ready 3-tier MERN architecture on Kubernetes with optimized resource allocation, reducing container image size by 40% and improving pod startup time. - Built a Jenkins CI/CD pipeline with secrets management and automated rollbacks, enabling zero-downtime deployments across AWS and Azure simultaneously using a unified multi-cloud strategy.	
Enterprise-Grade Infrastructure Automation with Terraform and AWS GitHub	May 2024
- Provisioned scalable and highly available AWS infrastructure using Terraform modules, including Auto Scaling Groups, Load Balancers, and multi-AZ architecture, reducing manual provisioning time by 80%. - Implemented monitoring and alerting using Prometheus, Grafana, and CloudWatch to enable proactive incident detection and performance optimization.	

Professional Certifications

Cloud DevOps (Intel)	AWS Cloud Practitioner Essentials (AWS)
Cloud DevOps Trainee (L&T EduTech)	AWS Certified Developer (LinkedIn Learning)

Education

Jodhpur Institute of Engineering and Technology <i>Bachelor of Technology in Computer Science, 8.43 CGPA</i>	India 2022 – 2026
